JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Adsorption
Adsorption and reduction kinetics of safranine T in self-assembled phospholipid monolayers deposited on mercury (Herrero et al.) 87
Effect of thallium ions on the adsorption of cyanide-containing species from cyanide and dicyanoaurate solutions on a polycrystalline gold electrode (Poškus et al.) 107
Alkanethiolate
Fine structure in the voltammetric desorption curves of alkanethiolate monolayers chemisorbed at gold (Zhong, Porter) 147
Amperometric detector
Ruthenium catalyst for amperometric determination of insulin at physiological pH (Gorski et al.) 191
Analysis
Two-dimensional condensation of organic adsorbates at the mercury|aqueous solution interface: A global analysis of critical parameters using Ising model formalism (Pushpalatha, Sangaranarayanan) 39
Anion radicals
Are strongly bulky hexa[alkylsulfonyl] benzenes able to lead reversibly to the corresponding anion radicals? (Ghanimi, Simonet) 217
Aqueous solutions
Spectroelectrochemical studies of *p*-benzoquinone reduction in aqueous media (Shim, Park) 201

Benzaldehydes
Ultrasonic effects on electro-organic processes. Part 7. Reduction of benzaldehydes on ultrasound vibrating electrodes (Atobe, Nonaka) 161
p-Benzoquinone
Spectroelectrochemical studies of *p*-benzoquinone reduction in aqueous media (Shim, Park) 201
Biospecific affinity
Surface-modified gold electrodes with biospecific affinity for lactate dehydrogenase based on Cibacron Blue 3FG-A self-assembled monolayers (Schlereth) 77
Bismuth single crystals
Adsorption of pyridine on the (111), (001) and (01$\bar{1}$) faces of bismuth (Lust et al.) 25

Capillary zone electrophoresis
The coulometric efficiency and steady state current for the end-column amperometric detector in capillary zone electrophoresis (Jin, Chen) 155
Carbon cathodes
Electrochemical reduction of mono- and dihalopyridines at carbon cathodes in dimethylformamide (Mubarak, Peters) 13
Carbon dioxide
Electrochemical reactions of CO_2 with *fac*-Re(dpk)$(CO)_3$Cl (dpk = di-2-pyridyl ketone) (Bakir, McKenzie) 61
Cation exchange
Dehydration of protonated Nafion® coatings induced by cation exchange and monitored by quartz crystal microgravimetry (Shi, Anson) 117
Cavity optimization
Optimization of the cavity size for AM1-SCRF calculations of electrode potentials in aqueous solution (Jalali-Heravi, Namazian) 139
Chemisorption
Fine structure in the voltammetric desorption curves of alkanethiolate monolayers chemisorbed at gold (Zhong, Porter) 147
Chromium
Electrocatalytic reduction of Cr(VI) by polypyrrole-modified glassy carbon electrodes (Wang, Rajeshwar) 183
Cibacron Blue 3FG-A
Surface-modified gold electrodes with biospecific affinity for lactate dehydrogenase based on Cibacron Blue 3FG-A self-assembled monolayers (Schlereth) 77
Coatings
Dehydration of protonated Nafion® coatings induced by cation exchange and monitored by quartz crystal microgravimetry (Shi, Anson) 117
Cold fusion
Analysis of cold fusion experiments generating excess heat, tritium and helium (Kozima et al.) 173
Composite electrodes
Microelectrode ensembles based on overlaying ultrathin porous polyacrylonitrile on dense carbon films (Wang et al.) 179
Concentration distribution
Concentration profiles of conducting species in polypyrrole films in cyclic voltammetry by means of a diode array detector (Tezuka et al.) 167
Condensation
Two-dimensional condensation of organic adsorbates at the mercury|aqueous solution interface: A global analysis of critical parameters using Ising model formalism (Pushpalatha, Sangaranarayanan) 39
Conducting polymers
Investigation of conducting polymer electrodes by impedance spectroscopy during electropolymerization under galvanostatic conditions (Popkirov et al.) 209
Coulometry
The coulometric efficiency and steady state current for the end-column amperometric detector in capillary zone electrophoresis (Jin, Chen) 155
Cyanide
Effect of thallium ions on the adsorption of cyanide-containing species from cyanide and dicyanoaurate solutions on a polycrystalline gold electrode (Poškus et al.) 107
Cyclic voltammetry
The cyclic voltammetric study of ferrate(VI) production (Bouzek et al.) 125
Cyclic voltammetry of polypyrrole
Concentration profiles of conducting species in polypyrrole films in cyclic voltammetry by means of a diode array detector (Tezuka et al.) 167

Dawson type heteropolyanions
Part I. A comparative electrochemical study of transition metal substituted Dawson type heteropolyanions (McCormac et al.) 49
Dehydration
Dehydration of protonated Nafion® coatings induced by cation exchange and monitored by quartz crystal microgravimetry (Shi, Anson) 117
Desorption
Fine structure in the voltammetric desorption curves of alkanethiolate monolayers chemisorbed at gold (Zhong, Porter) 147
Dialkoxybenzene
Electrochemical oxidation of 1,4-dialkoxybenzenes in organic media. Reversible one-electron process in a methylene chloride/trifluoroacetic acid mixture and electropolymerization reaction in dry acetonitrile (Fabre et al.) 67
Dicyanoaurate
Effect of thallium ions on the adsorption of cyanide-containing species from cyanide and dicyanoaurate solutions on a polycrystalline gold electrode (Poškus et al.) 107
Dihalopyridines
Electrochemical reduction of mono- and dihalopyridines at carbon cathodes in dimethylformamide (Mubarak, Peters) 13
Dimethoxybenzene
Electrochemical oxidation of 1,4-dialkoxybenzenes in organic media. Reversible one-electron process in a methylene chloride/trifluoroacetic acid mixture and electropolymerization reaction in dry acetonitrile (Fabre et al.) 67
Diode array detector
Concentration profiles of conducting species in polypyrrole films in cyclic voltammetry by means of a diode array detector (Tezuka et al.) 167

Efficiency
The coulometric efficiency and steady state current for the end-column amperometric detector in capillary zone electrophoresis (Jin, Chen) 155
Electrical double layer
Surface reactivity of α-Mn_2O_3 powders in aqueous suspensions (Ardizzone et al.) 19
Electric percolation threshold
Concentration profiles of conducting species in polypyrrole films in cyclic voltammetry by means of a diode array detector (Tezuka et al.) 167
Electrochemical reactions
Electrochemical reactions of CO_2 with *fac*-Re(dpk)$(CO)_3$Cl (dpk = di-2-pyridyl ketone) (Bakir, McKenzie) 61
Electrochemical reduction
Electrochemical reduction of mono- and dihalopyridines at carbon cathodes in dimethylformamide (Mubarak, Peters) 13
Electrochemical study
Part I. A comparative electrochemical study of transition metal substituted Dawson type heteropolyanions (McCormac et al.) 49
Electrochemical switching
Concentration profiles of conducting species in polypyrrole films in cyclic voltammetry by means of a diode array detector (Tezuka et al.) 167
Electrochemistry
Electrochemical oxidation of 1,4-dialkoxybenzenes in organic media. Reversible one-electron process in a methylene chloride/trifluoroacetic acid mixture and electropolymerization reaction in dry acetonitrile (Fabre et al.) 67
Electro-organic processes
Ultrasonic effects on electro-organic processes. Part 7. Reduction of benzaldehydes on ultrasound vibrating electrodes (Atobe, Nonaka) 161
Electropolymerization
Electrochemical oxidation of 1,4-dialkoxybenzenes in organic media. Reversible one-electron process in a methylene chloride/trifluoroacetic acid mixture and electropolymerization reaction in dry acetonitrile (Fabre et al.) 67
Electroreduction
Improved mediated tyrosinase amperometric enzyme electrodes (Hedenmo et al.) 1
Electrostatic interactions
Optimization of the cavity size for AM1-SCRF calculations of electrode potentials in aqueous solution (Jalali-Heravi, Namazian) 139
End-column amperometric detector
The coulometric efficiency and steady state current for the end-column amperometric detector in capillary zone electrophoresis (Jin, Chen) 155
Enzyme electrodes
Improved mediated tyrosinase amperometric enzyme electrodes (Hedenmo et al.) 1
Excess heat
Analysis of cold fusion experiments generating excess heat, tritium and helium (Kozima et al.) 173
Exocytosis
Ruthenium catalyst for amperometric determination of insulin at physiological pH (Gorski et al.) 191

FeO_2^{2-}
The cyclic voltammetric study of ferrate(VI) production (Bouzek et al.) 125
FeO_2^-
The cyclic voltammetric study of ferrate(VI) production (Bouzek et al.) 125
FeO_4^{2-} (ferrate(VI))
The cyclic voltammetric study of ferrate(VI) production (Bouzek et al.) 125
Ferrocene
Determination of the standard heterogeneous rate constant in polyelectrolyte using steady state microdisk voltammograms (Zhou, Dong) 55
Fine structure
Fine structure in the voltammetric desorption curves of alkanethiolate monolayers chemisorbed at gold (Zhong, Porter) 147
First scan effect
Concentration profiles of conducting species in polypyrrole films in cyclic voltammetry by means of a diode array detector (Tezuka et al.) 167

Galvanostatic control
Investigation of conducting polymer electrodes by impedance spectroscopy during electropolymerization under galvanostatic conditions (Popkirov et al.) 209
Glassy carbon electrodes
Electrocatalytic reduction of Cr(VI) by polypyrrole-modified glassy carbon electrodes (Wang, Rajeshwar) 183
Gold
Fine structure in the voltammetric desorption curves of alkanethiolate monolayers chemisorbed at gold (Zhong, Porter) 147
Gold electrode
Effect of thallium ions on the adsorption of cyanide-containing species from cyanide and dicyanoaurate solutions on a polycrystalline gold electrode (Poškus et al.) 107

Halopyridines
Electrochemical reduction of mono- and dihalopyridines at carbon cathodes in dimethylformamide (Mubarak, Peters) 13

Helium
Analysis of cold fusion experiments generating excess heat, tritium and helium (Kozima et al.) 173
Hexa[alkylsulfonyl] benzenes
Are strongly bulky hexa[alkylsulfonyl] benzenes able to lead reversibly to the corresponding anion radicals? (Ghanimi, Simonet) 217
Hysteresis
Concentration profiles of conducting species in polypyrrole films in cyclic voltammetry by means of a diode array detector (Tezuka et al.) 167

Impedance spectroscopy
Investigation of conducting polymer electrodes by impedance spectroscopy during electropolymerization under galvanostatic conditions (Popkirov et al.) 209
Insulin
Ruthenium catalyst for amperometric determination of insulin at physiological pH (Gorski et al.) 191
Iron electrode
The cyclic voltammetric study of ferrate(VI) production (Bouzek et al.) 125
Ising model
Two-dimensional condensation of organic adsorbates at the mercury|aqueous solution interface: A global analysis of critical parameters using Ising model formalism (Pushpalatha, Sangaranarayanan) 39

Kinetics
Adsorption and reduction kinetics of safranine T in self-assembled phospholipid monolayers deposited on mercury (Herrero et al.) 87

Lactate dehydrogenase
Surface-modified gold electrodes with biospecific affinity for lactate dehydrogenase based on Cibacron Blue 3FG-A self-assembled monolayers (Schlereth) 77

Mathematical models
Optimization of the cavity size for AM1-SCRF calculations of electrode potentials in aqueous solution (Jalali-Heravi, Namazian) 139
Mediation
Improved mediated tyrosinase amperometric enzyme electrodes (Hedenmo et al.) 1
Mercury|aqueous solution interface
Two-dimensional condensation of organic adsorbates at the mercury|aqueous solution interface: A global analysis of critical parameters using Ising model formalism (Pushpalatha, Sangaranarayanan) 39
Microdisk electrode
Determination of the standard heterogeneous rate constant in polyelectrolyte using steady state microdisk voltammograms (Zhou, Dong) 55
α-Mn_2O_3
Surface reactivity of α-Mn_2O_3 powders in aqueous suspensions (Ardizzone et al.) 19
Models
Aggregation phenomena occurring on an electrode surface in the presence or absence of aggregation in the bulk electrolyte solution (Nikitas) 97

Nafion®
Dehydration of protonated Nafion® coatings induced by cation exchange and monitored by quartz crystal microgravimetry (Shi, Anson) 117
Neutron
Analysis of cold fusion experiments generating excess heat, tritium and helium (Kozima et al.) 173
Nuclear reaction
Analysis of cold fusion experiments generating excess heat, tritium and helium (Kozima et al.) 173

Organic adsorbates
Two-dimensional condensation of organic adsorbates at the mercury|aqueous solution interface: A global analysis of critical parameters using Ising model formalism (Pushpalatha, Sangaranarayanan) 39

Partially blocked surfaces
Microelectrode ensembles based on overlaying ultrathin porous polyacrylonitrile on dense carbon films (Wang et al.) 179
Phospholipid monolayers
Adsorption and reduction kinetics of safranine T in self-assembled phospholipid monolayers deposited on mercury (Herrero et al.) 87
Physiological pH
Ruthenium catalyst for amperometric determination of insulin at physiological pH (Gorski et al.) 191
Polyacrylonitrile
Microelectrode ensembles based on overlaying ultrathin porous polyacrylonitrile on dense carbon films (Wang et al.) 179
Polybithiophene
Investigation of conducting polymer electrodes by impedance spectroscopy during electropolymerization under galvanostatic conditions (Popkirov et al.) 209
Polyelectrolyte
Determination of the standard heterogeneous rate constant in polyelectrolyte using steady state microdisk voltammograms (Zhou, Dong) 55
Polymerization
Investigation of conducting polymer electrodes by impedance spectroscopy during electropolymerization under galvanostatic conditions (Popkirov et al.) 209
Polyphenylenes
Electrochemical oxidation of 1,4-dialkoxybenzenes in organic media. Reversible one-electron process in a methylene chloride/trifluoroacetic acid mixture and electropolymerization reaction in dry acetonitrile (Fabre et al.) 67
Polypyrrole
Electrocatalytic reduction of Cr(VI) by polypyrrole-modified glassy carbon electrodes (Wang, Rajeshwar) 183
Protonation
Dehydration of protonated Nafion® coatings induced by cation exchange and monitored by quartz crystal microgravimetry (Shi, Anson) 117
Pyridine adsorption
Adsorption of pyridine on the (111), (001) and (01$\bar{1}$) faces of bismuth (Lust et al.) 25

Quartz crystal microbalance
Dehydration of protonated Nafion® coatings induced by cation exchange and monitored by quartz crystal microgravimetry (Shi, Anson) 117

Recessed microelectrodes
Microelectrode ensembles based on overlaying ultrathin porous polyacrylonitrile on dense carbon films (Wang et al.) 179
fac-Re(dpk)$(CO)_3Cl$
Electrochemical reactions of CO_2 with *fac*-Re(dpk)$(CO)_3Cl$ (dpk = di-2-pyridyl ketone) (Bakir, McKenzie) 61
Reduction
Adsorption and reduction kinetics of safranine T in self-assembled phospholipid monolayers deposited on mercury (Herrero et al.) 87
Ultrasonic effects on electro-organic processes. Part 7. Reduction of benzaldehydes on ultrasound vibrating electrodes (Atobe, Nonaka) 161

Electrocatalytic reduction of Cr(VI) by polypyrrole-modified glassy carbon electrodes (Wang, Rajeshwar) 183
Spectroelectrochemical studies of *p*-benzoquinone reduction in aqueous media (Shim, Park) 201
Reversible electron transfer
Are strongly bulky hexa[alkylsulfonyl] benzenes able to lead reversibly to the corresponding anion radicals? (Ghanimi, Simonet) 217
RRDE
The cyclic voltammetric study of ferrate(VI) production (Bouzek et al.) 125
Ruthenium catalyst
Ruthenium catalyst for amperometric determination of insulin at physiological pH (Gorski et al.) 191

Safranine-T
Adsorption and reduction kinetics of safranine T in self-assembled phospholipid monolayers deposited on mercury (Herrero et al.) 87
Self-assembled monolayers
Surface-modified gold electrodes with biospecific affinity for lactate dehydrogenase based on Cibacron Blue 3FG-A self-assembled monolayers (Schlereth) 77
Adsorption and reduction kinetics of safranine T in self-assembled phospholipid monolayers deposited on mercury (Herrero et al.) 87
Spectroelectrochemistry
Spectroelectrochemical studies of *p*-benzoquinone reduction in aqueous media (Shim, Park) 201
Standard heterogeneous rate constant
Determination of the standard heterogeneous rate constant in polyelectrolyte using steady state microdisk voltammograms (Zhou, Dong) 55
Steady state current
The coulometric efficiency and steady state current for the end-column amperometric detector in capillary zone electrophoresis (Jin, Chen) 155
Steady state voltammogram
Determination of the standard heterogeneous rate constant in polyelectrolyte using steady state microdisk voltammograms (Zhou, Dong) 55
Substitution
Part I. A comparative electrochemical study of transition metal substituted Dawson type heteropolyanions (McCormac et al.) 49
Surface aggregation
Aggregation phenomena occurring on an electrode surface in the presence or absence of aggregation in the bulk electrolyte solution (Nikitas) 97
Surface heterogeneity
Surface reactivity of α-Mn_2O_3 powders in aqueous suspensions (Ardizzone et al.) 19
Surface-modified electrodes
Surface-modified gold electrodes with biospecific affinity for lactate dehydrogenase based on Cibacron Blue 3FG-A self-assembled monolayers (Schlereth) 77

Thallium
Effect of thallium ions on the adsorption of cyanide-containing species from cyanide and dicyanoaurate solutions on a polycrystalline gold electrode (Poškus et al.) 107
Transition metal
Part I. A comparative electrochemical study of transition metal substituted Dawson type heteropolyanions (McCormac et al.) 49
Tritium
Analysis of cold fusion experiments generating excess heat, tritium and helium (Kozima et al.) 173
Tyrosinase
Improved mediated tyrosinase amperometric enzyme electrodes (Hedenmo et al.) 1

Ultrasound
Ultrasonic effects on electro-organic processes. Part 7. Reduction of benzaldehydes on ultrasound vibrating electrodes (Atobe, Nonaka) 161
Underpotential deposition
Effect of thallium ions on the adsorption of cyanide-containing species from cyanide and dicyanoaurate solutions on a polycrystalline gold electrode (Poškus et al.) 107

Voltammetry
Fine structure in the voltammetric desorption curves of alkanethiolate monolayers chemisorbed at gold (Zhong, Porter) 147
